Notes for Ordering Qscan

POWER

Qscan readers are powered by 12Vdc. You can use your own power source or request an AC adapter from IBC when ordering.

WIRING

Standard wiring for Qscan readers with wiegand, aba, wand, or f2f is a 3' cable containing all data wires and power wires.

Standard wiring for RS232 readers is a 3' cable with a DB9 female connector. The pin-out is a direct connect to a pc. Connected to the DB9 connector is a short power pigtail for applying power or connecting an ac adapter.

Standard wiring for Qscan readers with tcp/ip is a 3' cable with an rj45 plug.

RF

Qscan can be ordered with embedded proximity to read Ibc, Hid, Awid, and Farpointe cards. Qscan can also be ordered with

embedded 13mhz support to read either Hid Iclass cards or cards which support PIV-II applications (Cac, Twic, etc..)

SENSE INPUTS

2 digital inputs may optionally be ordered. The digital inputs can be used for a door sense or gate sense, or for an arming loop to enable/disable reading.

RELAY

The optional relay is a form C relay and has a separate wire exiting the rear of the reader containing the isolated relay lines.

DISPLAY

The optional 2 line x 16 character display is an IBC proprietary FSTN LCD display, and is able to be read in direct sunlight and at wide angles.

BLUETOOTH

Bluetooth can be ordered as an option only on readers ordered with a wiegand output. Not all configurations are possible with the Bluetooth option. Contact IBC for more information.

For custom wiring or firmware contact IBC.
